Chemical Engineering Journal 78 (2000) 245–248

Chemical Engineering Journal

www.elsevier.com/locate/cej

Subject Index of Volume 78

Ammonia reactors
Application of heat interchange systems to enhance the performance of ammonia reactors, 69
Atomization process
Application of fractal geometry to atomization process, 193
Axial dispersion coefficient
Liquid phase dispersion in bubble columns operating in the churn-turbulent flow regime, 43

Basic data
A new model of thermal conductivity for liquids, 187
Binodal
Measurement and calculation of liquid–liquid equilibria of binary aqueous polymer solutions, 179
Bipolar membrane
Application of electrodialysis to the production of Vitamin C, 153
Boiling heat transfer
A study on boiling heat transfer in three-phase circulating fluidized bed, 217
Bubble break-up
Phenomenological model for bubble column reactors: prediction of gas hold-ups and volumetric mass transfer coefficients, 21
Bubble coalescence
Phenomenological model for bubble column reactors: prediction of gas hold-ups and volumetric mass transfer coefficients, 21
Bubble column
Transient three-dimensional numerical analyses of shallow bubble column, 5
Bubble column reactor
Phenomenological model for bubble column reactors: prediction of gas hold-ups and volumetric mass transfer coefficients, 21
Bubble columns
Liquid phase dispersion in bubble columns operating in the churn-turbulent flow regime, 43
Bubble rise velocity
Liquid phase dispersion in bubble columns operating in the churn-turbulent flow regime, 43

Carbon monoxide
New methods to prepare ultrafine particles of some perovskite-type oxides, 205
Catalyst
Intrinsic kinetics of direct oxidative carbonylation of vapour phase methanol to dimethyl carbonate over Cu-based catalysts, 237
Catalytic oxidation
New methods to prepare ultrafine particles of some perovskite-type oxides, 205
Cellulose sulphation
An improved process for the preparation of sodium cellulose sulphate, 199
Centrifugal fluidized bed
Experimental investigation of the heat and mass transfer in a centrifugal fluidized bed dryer, 107
Ceria
Reactive behaviors of iron-based shift catalyst promoted by ceria, 147
Chinese research
Advances in dropwise condensation heat transfer: Chinese research, 87
Churn-turbulent flow regime
Liquid phase dispersion in bubble columns operating in the churn-turbulent flow regime, 43
Circulating fluidized bed
A study on boiling heat transfer in three-phase circulating fluidized bed, 217
Cloud-point
Measurement and calculation of liquid–liquid equilibria of binary aqueous polymer solutions, 179
Coalescence–dispersion
Mass transfer performance in a coalescence–dispersion pulsed sieve plate extraction column, 225
Column diameter influence
Liquid phase dispersion in bubble columns operating in the churn-turbulent flow regime, 43
Computational fluid dynamics
Physical modelling and numerical simulation of velocity fields in rotating disc contactor via CFD simulation and LDV measurement, 131
Control strategy
Modelling and predictive control of fed-batch yeast growth on industrial pilot plant scale, 53
Convective heat transfer
Augmentation of convective heat transfer inside tubes with three-dimensional internal extended surfaces and twisted-tape inserts, 95
CO_2-rich gas mixtures
Experimental and modeling studies on the hydrate formation of CO_2 and CO_2-rich gas mixtures, 173
β-Cyclodextrin
PVA membrane filled β-cyclodextrin for separation of isomeric xylenes by pervaporation, 159

Danckwerts method
Application of the Danckwerts method in a bubble column. Effects of surfactants on mass transfer coefficient and interfacial area, 13
Data
Experimental and modeling studies on the hydrate formation of CO_2 and CO_2-rich gas mixtures, 173
Desalination
Application of electrodialysis to the production of Vitamin C, 153
Diffusion coefficient
PVA membrane filled β-cyclodextrin for separation of isomeric xylenes by pervaporation, 159
Diffusivity
The measurement of effective diffusivity for sulfur-tolerant methanation catalyst, 141
Dimethyl carbonate
Intrinsic kinetics of direct oxidative carbonylation of vapour phase methanol to dimethyl carbonate over Cu-based catalysts, 237

1385-8947/00/$ – see front matter © 2000 Elsevier Science S.A. All rights reserved.
PII: S1385-8947(00)00206-0

Direct methanol fuel cell
Modelling pressure distribution and anode/cathode streams vapour–liquid equilibrium composition in liquid feed direct methanol fuel cells, 29
Dispersed flow model
Transient three-dimensional numerical analyses of shallow bubble column, 5
Dispersion polymerization
Micron-size uniform poly(methyl methacrylate) particles by dispersion polymerization in polar media. 1. Particle size and particle size distribution, 211
Droplet size distribution
Application of fractal geometry to atomization process, 193
Dropwise condensation
Advances in dropwise condensation heat transfer: Chinese research, 87
Drying
Experimental investigation of the heat and mass transfer in a centrifugal fluidized bed dryer, 107
Dynamic liquid holdup
Correlations for dynamic liquid holdup under pulsing flow in a trickle-bed reactor, 125
Dynamic tracer method
Mass transfer performance in a coalescence–dispersion pulsed sieve plate extraction column, 225

Electrodialysis
Application of electrodialysis to the production of Vitamin C, 153
Energy optimization
Application of heat interchange systems to enhance the performance of ammonia reactors, 69
Ethanol concentration
Modelling and predictive control of fed-batch yeast growth on industrial pilot plant scale, 53
Ethylene glycol
Experimental and modeling studies on the hydrate formation of CO_2 and CO_2-rich gas mixtures, 173
Ethylene oxide and propylene oxide
Measurement and calculation of liquid–liquid equilibria of binary aqueous polymer solutions, 179
Evaporator efficiency
Feed temperature influence on the efficiency of a molecular evaporator, 61
Extraction
Physical modelling and numerical simulation of velocity fields in rotating disc contactor via CFD simulation and LDV measurement, 131

Fed-batch yeast growth
Modelling and predictive control of fed-batch yeast growth on industrial pilot plant scale, 53
Feed temperature
Feed temperature influence on the efficiency of a molecular evaporator, 61
Fluidization
Energy transfer mechanism in a vibrating fluidized bed, 115
Fractal geometry
Application of fractal geometry to atomization process, 193
Free surface
Transient three-dimensional numerical analyses of shallow bubble column, 5
Frictional characteristics
Augmentation of convective heat transfer inside tubes with three-dimensional internal extended surfaces and twisted-tape inserts, 95

Gas hold-up
Phenomenological model for bubble column reactors: prediction of gas hold-ups and volumetric mass transfer coefficients, 21
Gas–liquid two-phase flow
Transient three-dimensional numerical analyses of shallow bubble column, 5
Gas–liquid–solid three-phase flow
Solid–liquid mass transfer in a gas–liquid–solid three-phase reversed flow jet loop reactor, 231

Heat and mass transfer
Experimental investigation of the heat and mass transfer in a centrifugal fluidized bed dryer, 107
Heat transfer
Advances in dropwise condensation heat transfer: Chinese research, 87
Heterogeneous model
Application of heat interchange systems to enhance the performance of ammonia reactors, 69
Hydrate formation
Experimental and modeling studies on the hydrate formation of CO_2 and CO_2-rich gas mixtures, 173

Immobilization
An improved process for the preparation of sodium cellulose sulphate, 199
Interfacial area
Application of the Danckwerts method in a bubble column. Effects of surfactants on mass transfer coefficient and interfacial area, 13

KD306 catalyst
The measurement of effective diffusivity for sulfur-tolerant methanation catalyst, 141
2-keto-L-gulonic acid
Application of electrodialysis to the production of Vitamin C, 153
Kinetics
Intrinsic kinetics of direct oxidative carbonylation of vapour phase methanol to dimethyl carbonate over Cu-based catalysts, 237

Laminar flow
Augmentation of convective heat transfer inside tubes with three-dimensional internal extended surfaces and twisted-tape inserts, 95
L-ascorbic acid (Vitamin C)
Application of electrodialysis to the production of Vitamin C, 153
Liquid–liquid equilibria
Measurement and calculation of liquid–liquid equilibria of binary aqueous polymer solutions, 179
Liquid–liquid equilibrium
Salting-out separation and liquid–liquid equilibrium of tertiary butanol aqueous solution, 165

Mass transfer
Physical modelling and numerical simulation of velocity fields in rotating disc contactor via CFD simulation and LDV measurement, 131
Mass transfer performance in a coalescence–dispersion pulsed sieve plate extraction column, 225
Mass transfer coefficient
Application of the Danckwerts method in a bubble column. Effects of surfactants on mass transfer coefficient and interfacial area, 13
Mechanism
Energy transfer mechanism in a vibrating fluidized bed, 115
Methanol
Intrinsic kinetics of direct oxidative carbonylation of vapour phase methanol to dimethyl carbonate over Cu-based catalysts, 237
Model
Experimental and modeling studies on the hydrate formation of CO_2 and CO_2-rich gas mixtures, 173
Measurement and calculation of liquid–liquid equilibria of binary aqueous polymer solutions, 179

Modeling
A new model of thermal conductivity for liquids, 187
Modelling
Modelling pressure distribution and anode/cathode streams vapour–liquid equilibrium composition in liquid feed direct methanol fuel cells, 29
Molecular distillation
Feed temperature influence on the efficiency of a molecular evaporator, 61
Molecular evaporator
Feed temperature influence on the efficiency of a molecular evaporator, 61
Monodisperse polymer particles
Micron-size uniform poly(methyl methacrylate) particles by dispersion polymerization in polar media. 1. Particle size and particle size distribution, 211

Numerical analysis
Transient three-dimensional numerical analyses of shallow bubble column, 5

Oxidative carbonylation
Intrinsic kinetics of direct oxidative carbonylation of vapour phase methanol to dimethyl carbonate over Cu-based catalysts, 237

Particle size and its distribution
Micron-size uniform poly(methyl methacrylate) particles by dispersion polymerization in polar media. 1. Particle size and particle size distribution, 211
Perovskite
New methods to prepare ultrafine particles of some perovskite-type oxides, 205
Pervaporation
PVA membrane filled β-cyclodextrin for separation of isomeric xylenes by pervaporation, 159
Poly(methyl methacrylate)
Micron-size uniform poly(methyl methacrylate) particles by dispersion polymerization in polar media. 1. Particle size and particle size distribution, 211
Poly-dimethyl-diallyl-ammonium-chloride
An improved process for the preparation of sodium cellulose sulphate, 199
Polymer solution
Measurement and calculation of liquid–liquid equilibria of binary aqueous polymer solutions, 179
Polyvinyl alcohol
PVA membrane filled β-cyclodextrin for separation of isomeric xylenes by pervaporation, 159
Potassium fluoride
Salting-out separation and liquid–liquid equilibrium of tertiary butanol aqueous solution, 165
Predictive control
Modelling and predictive control of fed-batch yeast growth on industrial pilot plant scale, 53
Pressure distribution
Modelling pressure distribution and anode/cathode streams vapour–liquid equilibrium composition in liquid feed direct methanol fuel cells, 29
Pressure drop
Modelling pressure distribution and anode/cathode streams vapour–liquid equilibrium composition in liquid feed direct methanol fuel cells, 29
Pressure wave
Energy transfer mechanism in a vibrating fluidized bed, 115
Pulsed sieve extraction column
Mass transfer performance in a coalescence–dispersion pulsed sieve plate extraction column, 225
Pulsing flow
Correlations for dynamic liquid holdup under pulsing flow in a trickle-bed reactor, 125

Radial velocity profiles
Liquid phase dispersion in bubble columns operating in the churn-turbulent flow regime, 43
Reversed jet loop reactors
Solid–liquid mass transfer in a gas–liquid–solid three-phase reversed flow jet loop reactor, 231
Rotating disc contactor
Physical modelling and numerical simulation of velocity fields in rotating disc contactor via CFD simulation and LDV measurement, 131

Salting out
Salting-out separation and liquid–liquid equilibrium of tertiary butanol aqueous solution, 165
Separation
Salting-out separation and liquid–liquid equilibrium of tertiary butanol aqueous solution, 165
Single pellet string reactor
The measurement of effective diffusivity for sulfur-tolerant methanation catalyst, 141
Sodium cellulose sulphate
An improved process for the preparation of sodium cellulose sulphate, 199
Solid–liquid mass transfer
Solid–liquid mass transfer in a gas–liquid–solid three-phase reversed flow jet loop reactor, 231
Solubility
PVA membrane filled β-cyclodextrin for separation of isomeric xylenes by pervaporation, 159
Spinodal
Measurement and calculation of liquid–liquid equilibria of binary aqueous polymer solutions, 179
Stacks
Modelling pressure distribution and anode/cathode streams vapour–liquid equilibrium composition in liquid feed direct methanol fuel cells, 29
Supercritical drying
New methods to prepare ultrafine particles of some perovskite-type oxides, 205
Surfactants
Application of the Danckwerts method in a bubble column. Effects of surfactants on mass transfer coefficient and interfacial area, 13
Synthesis
New methods to prepare ultrafine particles of some perovskite-type oxides, 205

Temperature-programmed desorption
Reactive behaviors of iron-based shift catalyst promoted by ceria, 147
Temperature-programmed reaction
Reactive behaviors of iron-based shift catalyst promoted by ceria, 147
Tertiary butanol
Salting-out separation and liquid–liquid equilibrium of tertiary butanol aqueous solution, 165
Thermodynamics
A new model of thermal conductivity for liquids, 187
Three-dimensional analysis
Transient three-dimensional numerical analyses of shallow bubble column, 5
Three-phase flow
A study on boiling heat transfer in three-phase circulating fluidized bed, 217

Trickle-bed reactors
Correlations for dynamic liquid holdup under pulsing flow in a trickle-bed reactor, 125

Ultrafine particles
New methods to prepare ultrafine particles of some perovskite-type oxides, 205

Vibrating fluidized bed
Energy transfer mechanism in a vibrating fluidized bed, 115

Volumetric mass transfer coefficient
Phenomenological model for bubble column reactors: prediction of gas hold-ups and volumetric mass transfer coefficients, 21

Water–gas shift reaction
Reactive behaviors of iron-based shift catalyst promoted by ceria, 147

Wave propagation
Energy transfer mechanism in a vibrating fluidized bed, 115
